

Graphene Electronics Market - Global Industry Analysis, Size, Share, Growth, Trends, And Forecast, 2013 - 2019

Graphene technology is a booming area in the electronics market. Graphene is an evolving steering material with a capacity to substitute typical conductors such as indium tin oxide (ITO) in optical and electrical. This conducting material has numerous benefits including high optical lucidity, exceptional physical and mechanical properties and stumpy sheet resistance. Graphene as a conducting

material used in various application such as integrated chips, transistors, solar cells, radio frequency identification(RFID), nano-intermediates, flexible devices and smart packaging among others.

Superior functionality and performance of graphene over other electrode materials is the major driving factor for increasing the demand of graphene electronic market. Additionally, nanotechnology, flexible electronics, wearable technology, spintronics, biotechnology and others are concentrating on graphene conducting material in developing technology

The graphene electronic market is segmented on the basis of products, materials, technology, end user application and geography. The product market are sub-divided into seven segments such as computing and consumer electronic, display and touch products, memory and storage products, wearable technology products, nanotechnology products, electric and photovoltaic products and others (antennas, RFID, and imaging). Graphene technology market are sub-divided into three segments includes chemical vapor deposition (CVD), graphite ore and others. The CVD is sub-segmented into plasma and thermal CVD process. Additionally, global graphene electronic market are segmented based on geography such as North America, Europe, Asia Pacific (APAC) and Rest of World (RoW).

Some of the leading players in Graphene electronics market are Samsung Electronics Co. Ltd., Nokia Oyj, Sony Corp., Graf Tech International, Inc., Graphene Frontiers LLC, CrayoNano, IBM, AMD, Lomiko Metals, Inc., Quantum Materials Corporation, Grafen Chemical Industries Co. Ltd. and several others.

This research report analyzes this market depending on its market segments, major geographies, and current market trends. Geographies analyzed under this research report include

- North America
- Asia Pacific
- Europe

- Rest of the World

This report provides comprehensive analysis of

- Market growth drivers
- Factors limiting market growth
- Current market trends
- Market structure
- Market projections for upcoming years

This report is a complete study of current trends in the market, industry growth drivers, and restraints. It provides market projections for the coming years. It includes analysis of recent developments in technology, Porter's five force model analysis and detailed profiles of top industry players. The report

also includes a review of micro and macro factors essential for the existing market players and new entrants along with detailed value chain analysis.

Reasons for Buying this Report

- This report provides pin-point analysis for changing competitive dynamics
- It provides a forward looking perspective on different factors driving or restraining market growth
- It provides a technological growth map over time to understand the industry growth rate
- It provides a seven-year forecast assessed on the basis of how the market is predicted to grow

- It helps in understanding the key product segments and their future
- It provides pin point analysis of changing competition dynamics and keeps you ahead of competitors
- It helps in making informed business decisions by having complete insights of market and by making in-depth analysis of market segments
- It provides distinctive graphics and exemplified SWOT analysis of major market segments
